Which comparison is easier?

Same Pokémon. Same Attack values.

POSITION + LENGTH

AREA

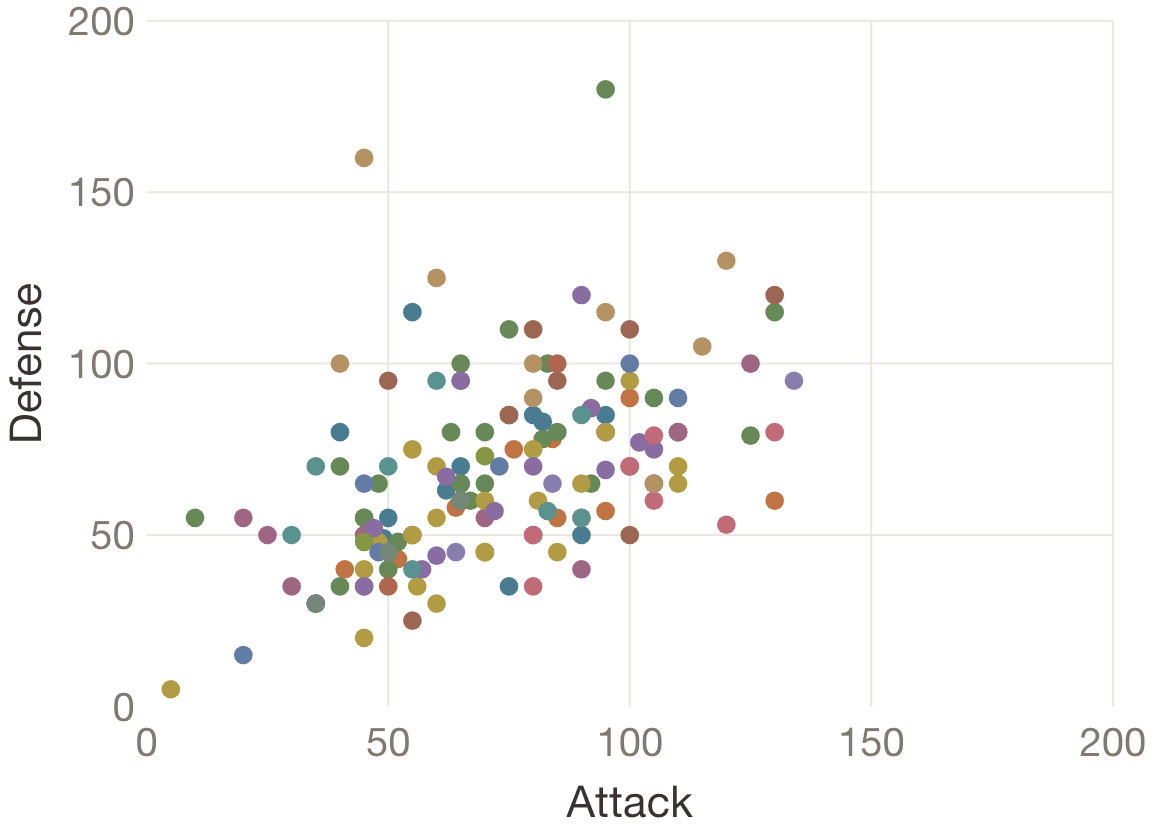

5 selected species · base Attack

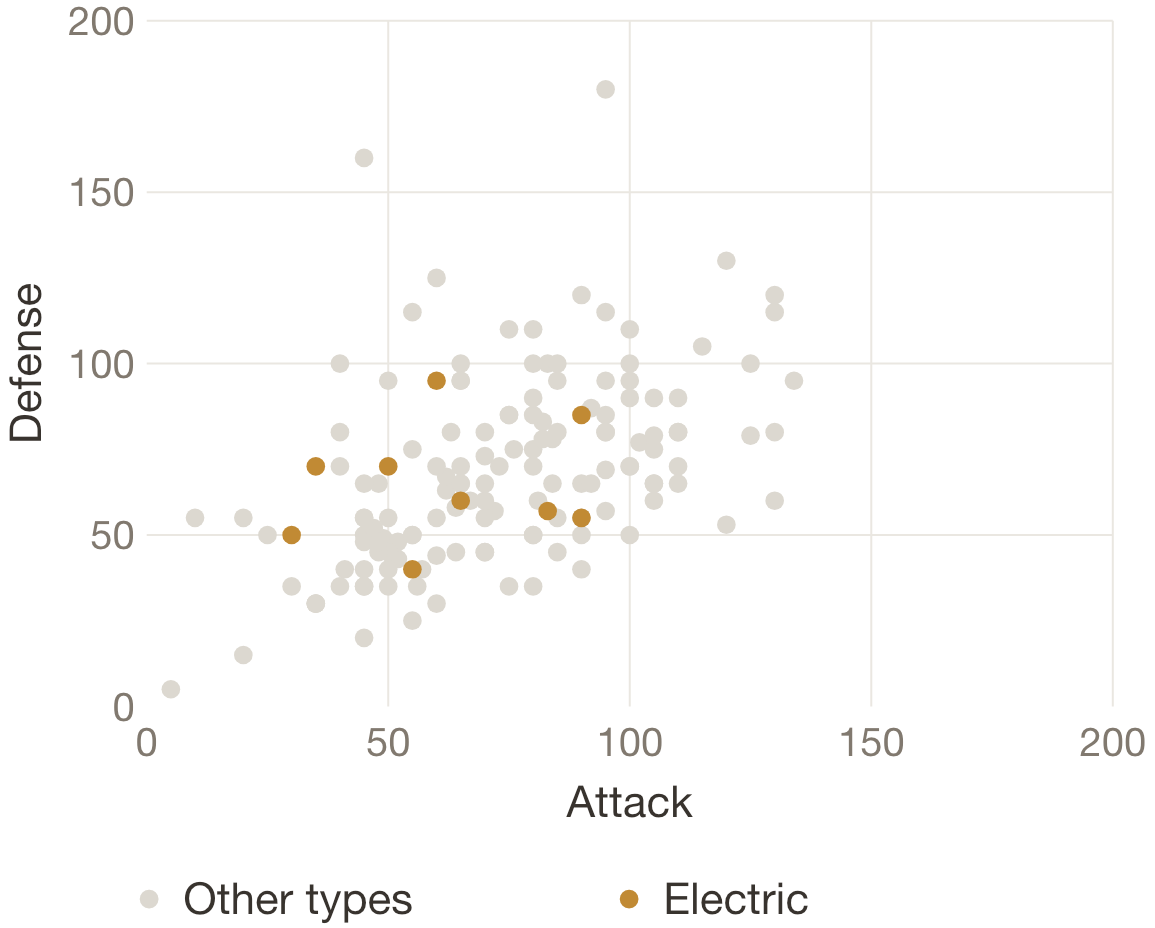

What catches your eye first?

Color everything — or direct attention?

ALL TYPES

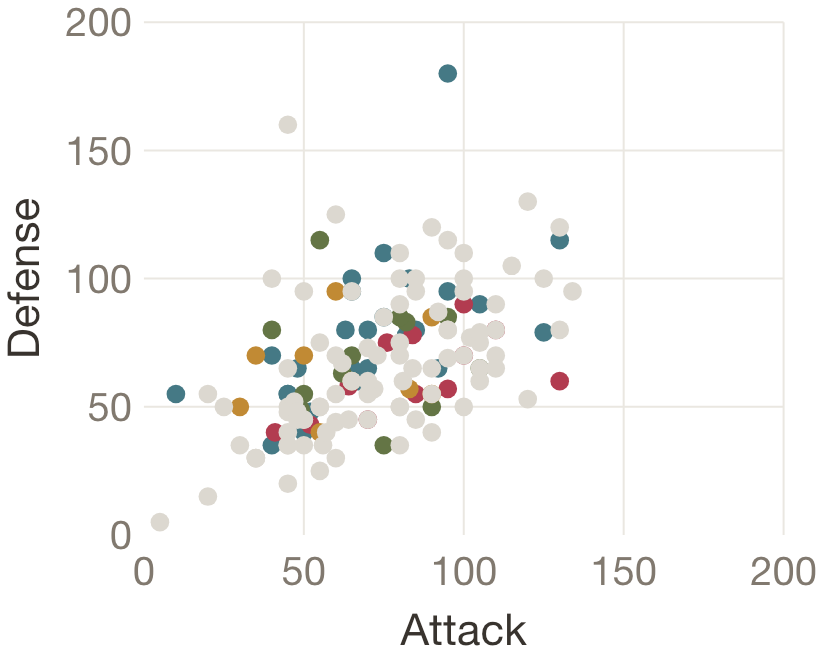

ELECTRIC IN FOCUS

Color needs a job.

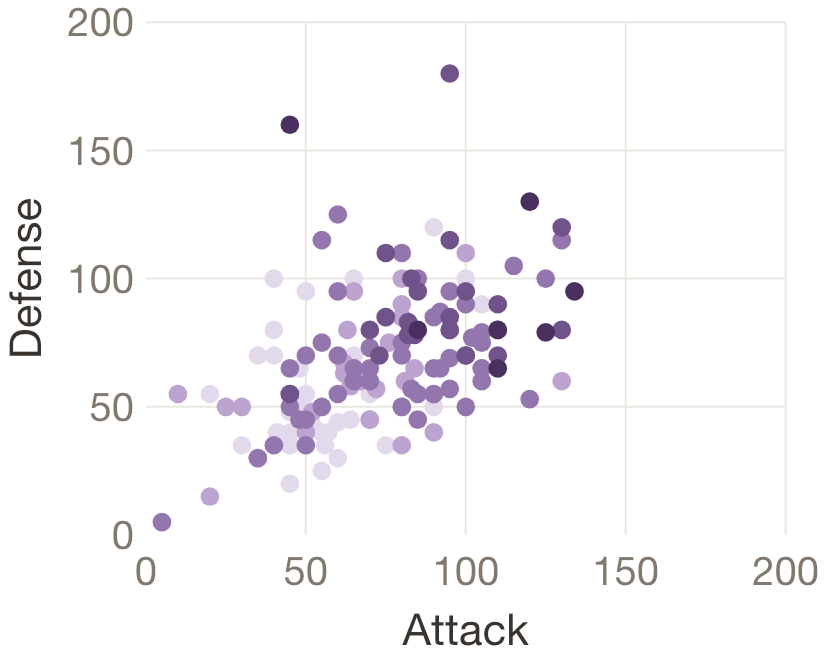

Different kinds of data need different color logic.

TYPE

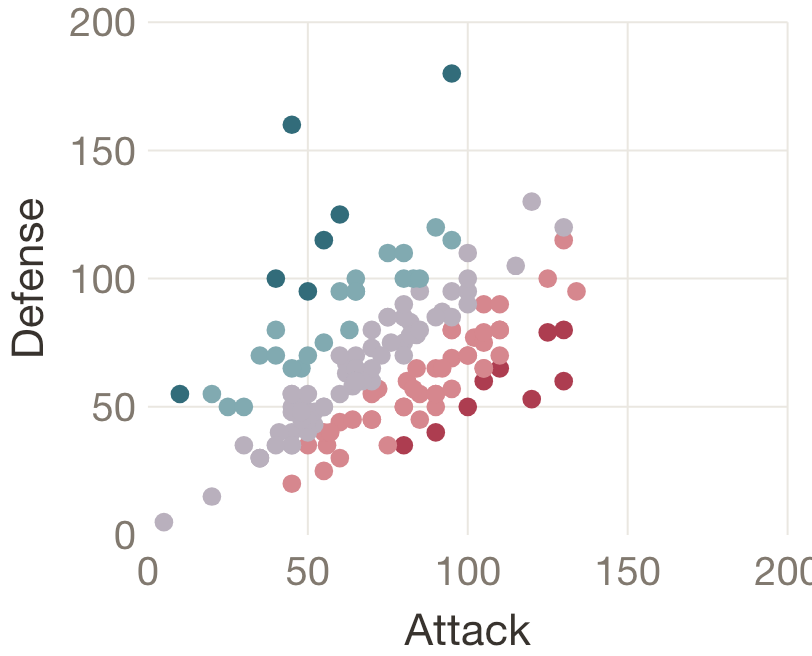

- Water
- Fire
- Grass
- Electric
- Other

WEIGHT

- 0–<10 kg
- 10–<30 kg
- 30–<70 kg
- 70–<150 kg
- 150+ kg

DEFENSE – ATTACK

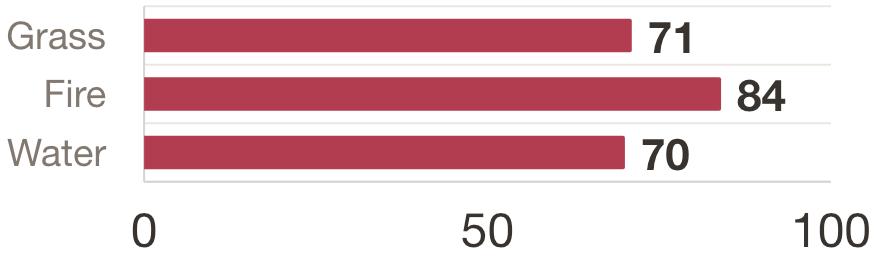

- ≤–41
- –40…–11
- –10…10
- 11…40
- ≥41

Layout creates relationships.

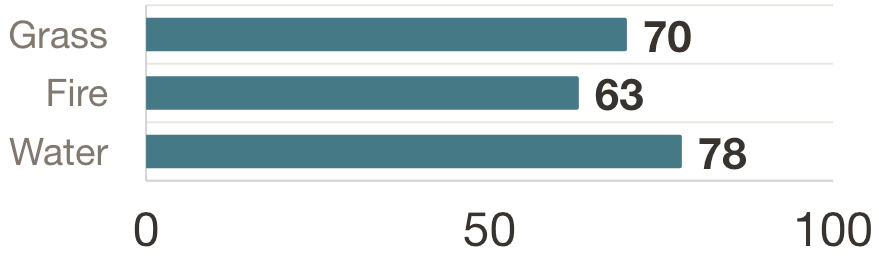

Same values. Different alignment.

SCATTERED

Attack

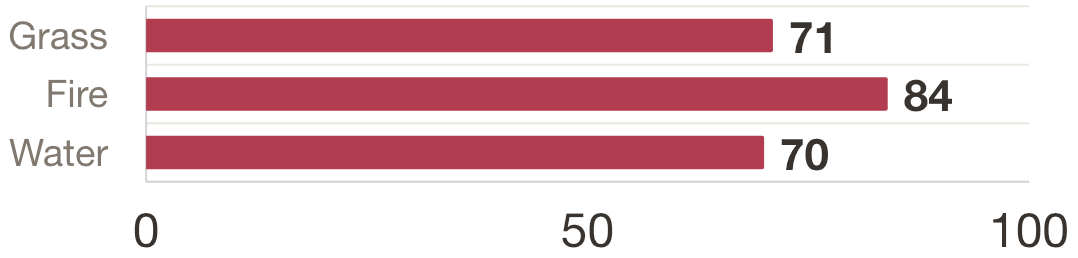

Defense

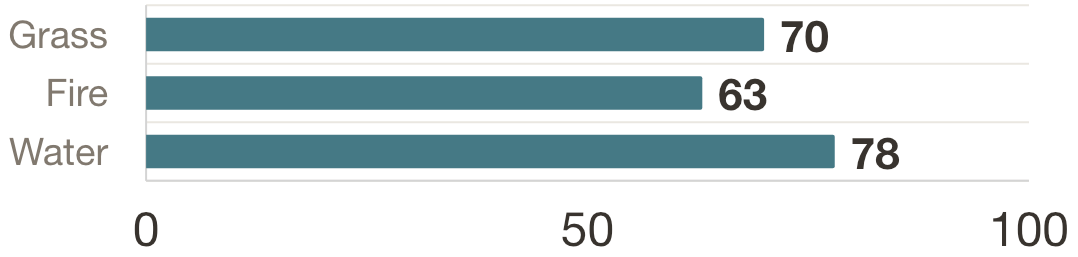

ALIGNED

Attack

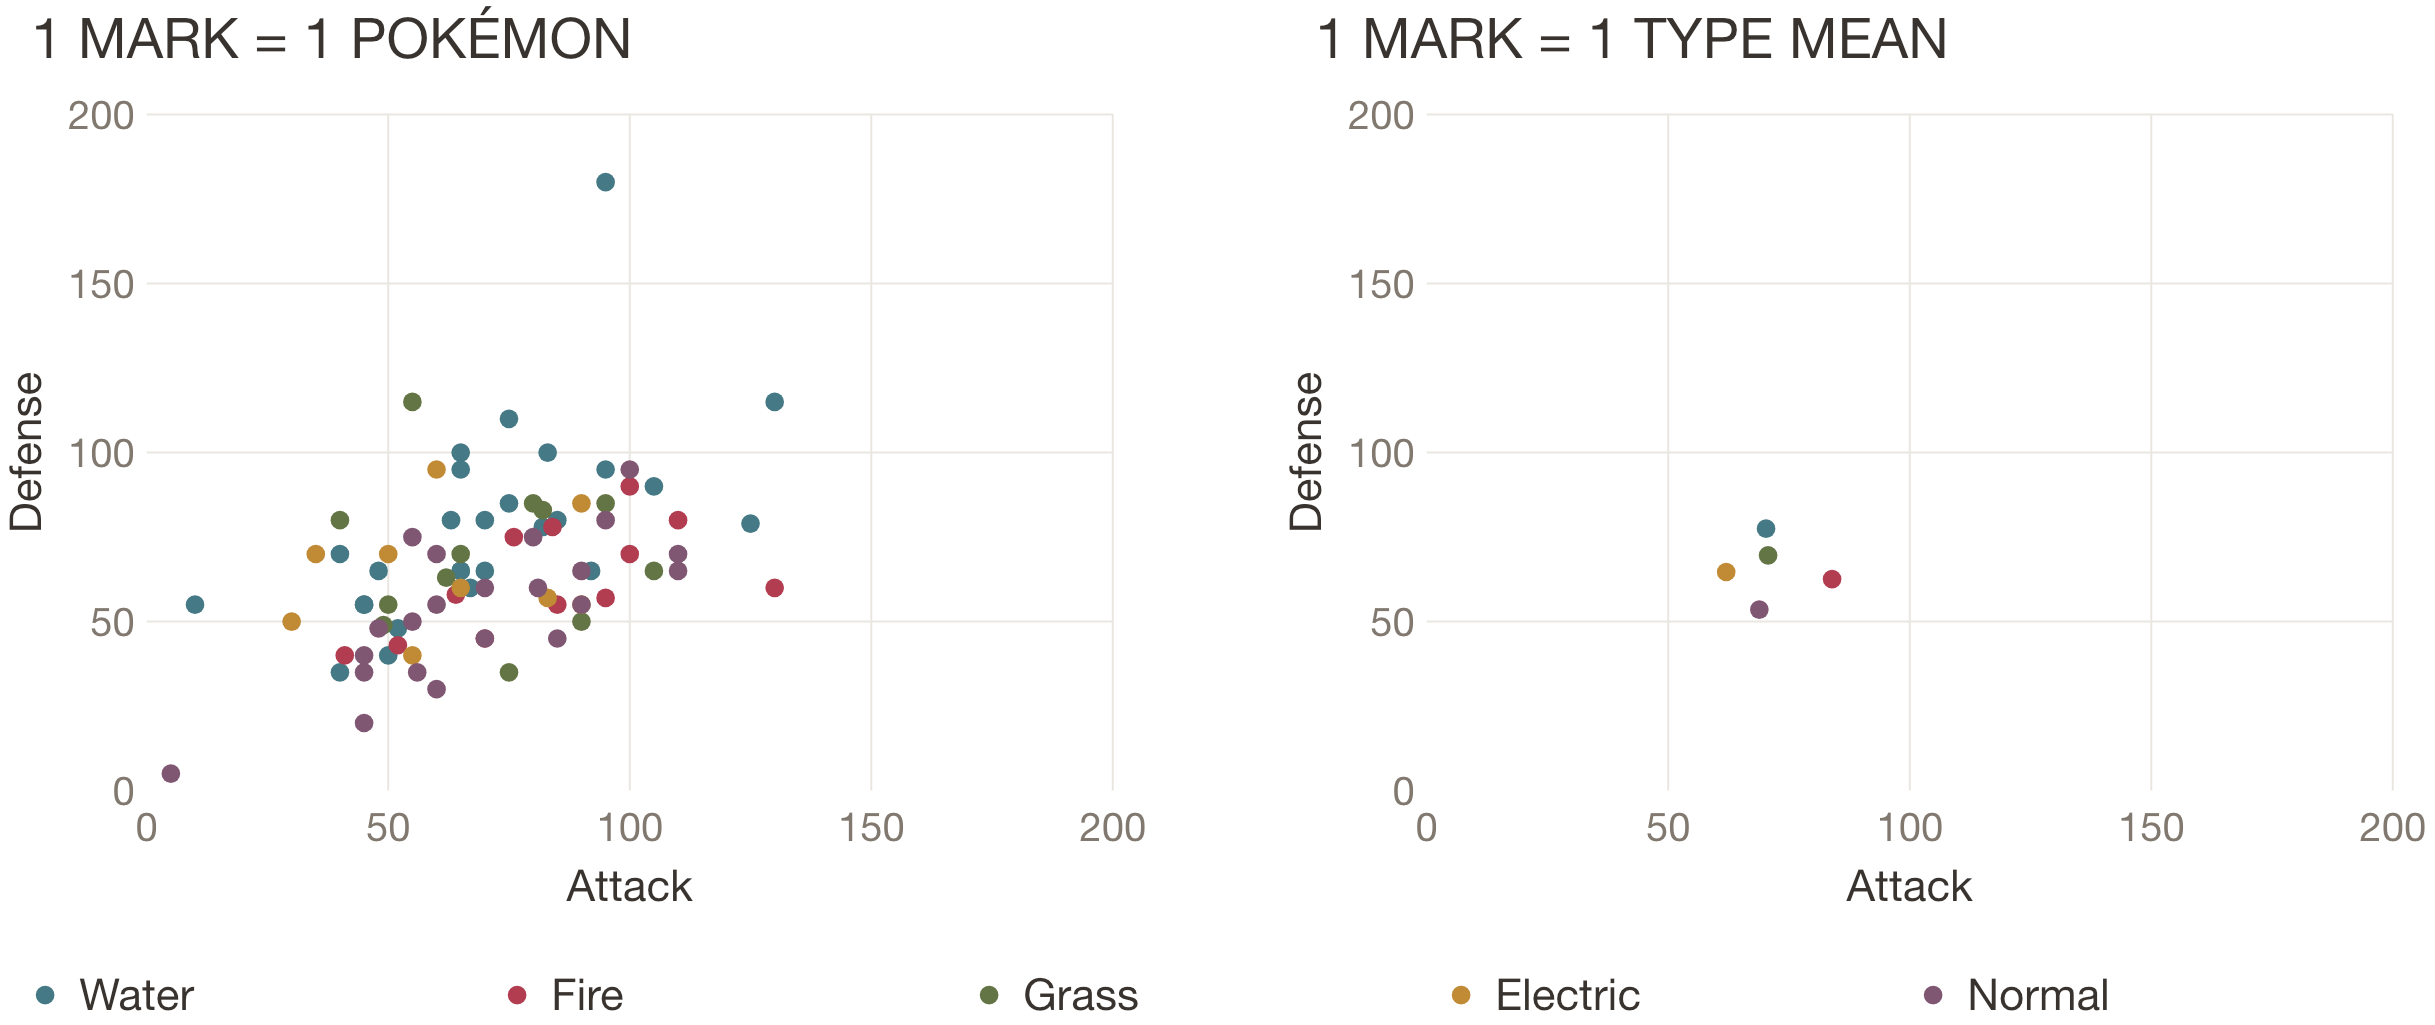

Defense

Mean base stats · primary type · rounded to whole numbers

What does one mark represent?

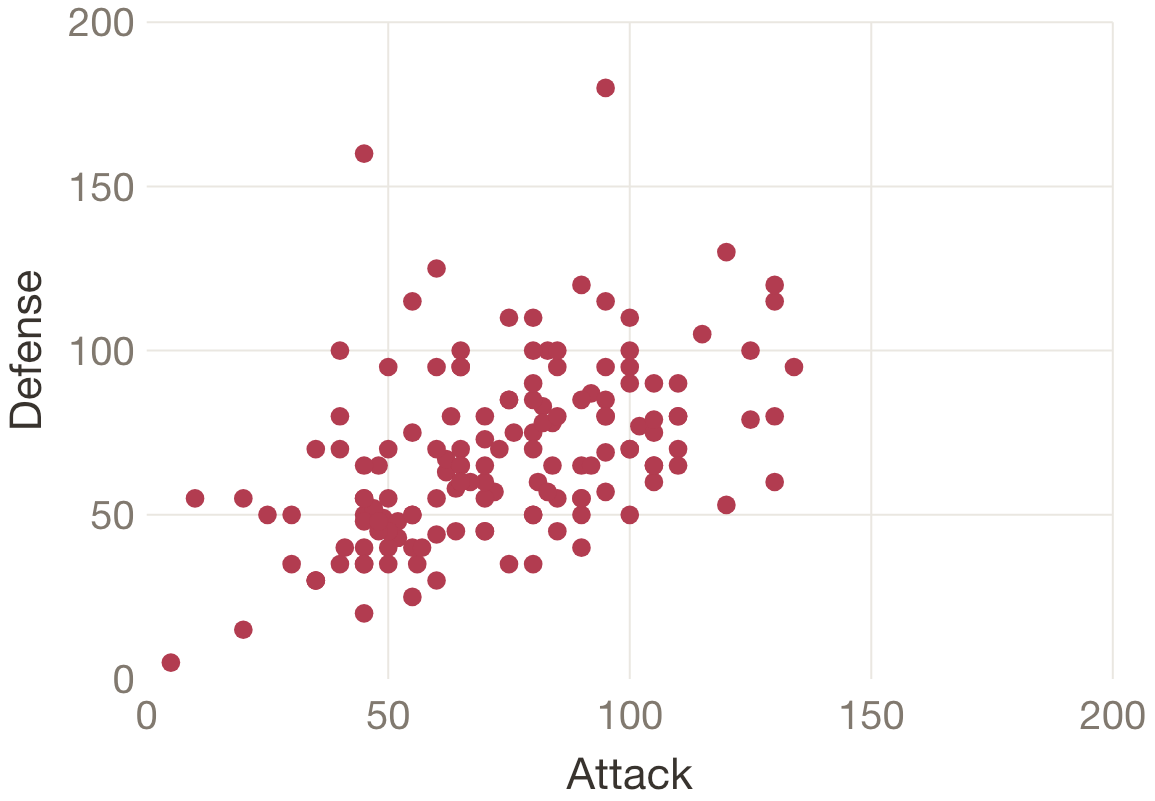

Aggregation changes the story.

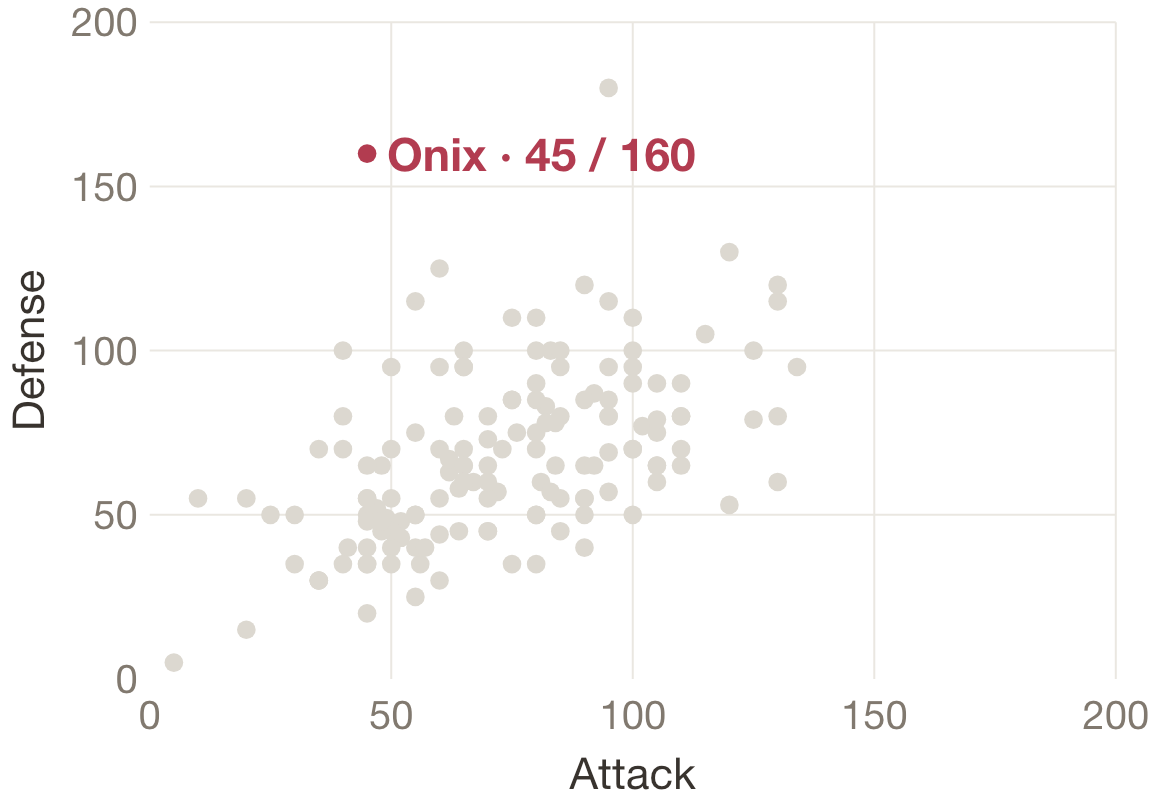

Help the reader find the point.

A title is a chance to say something.

Pokémon stats

Onix: high Defense, low Attack

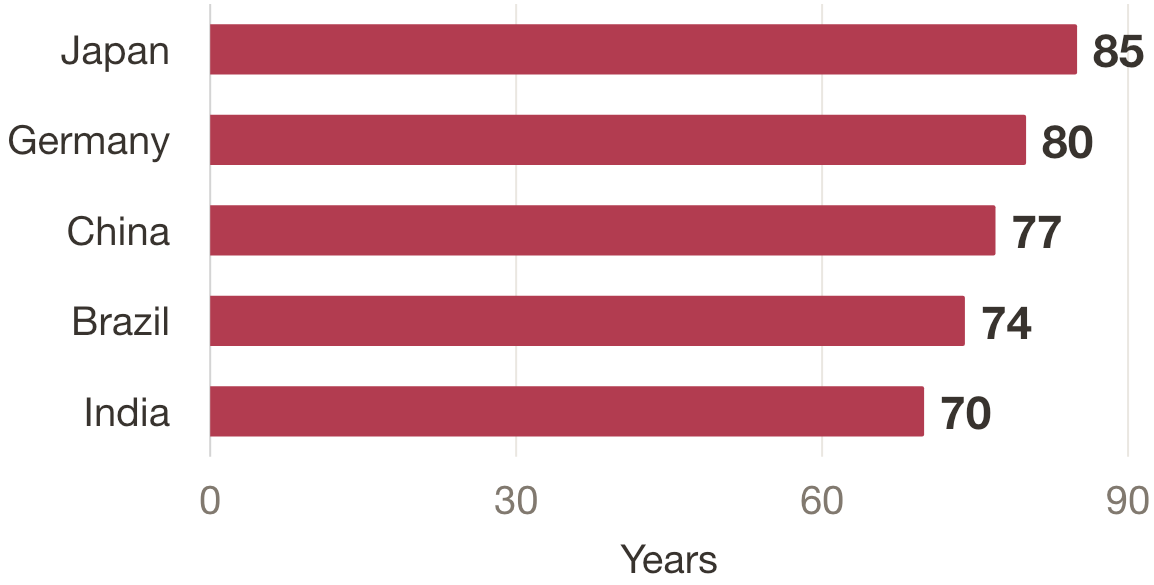

ONE CLEAR CLAIM. ONE USEFUL LABEL.

Tableau chart types: comparisons

Life expectancy in five countries (2020)

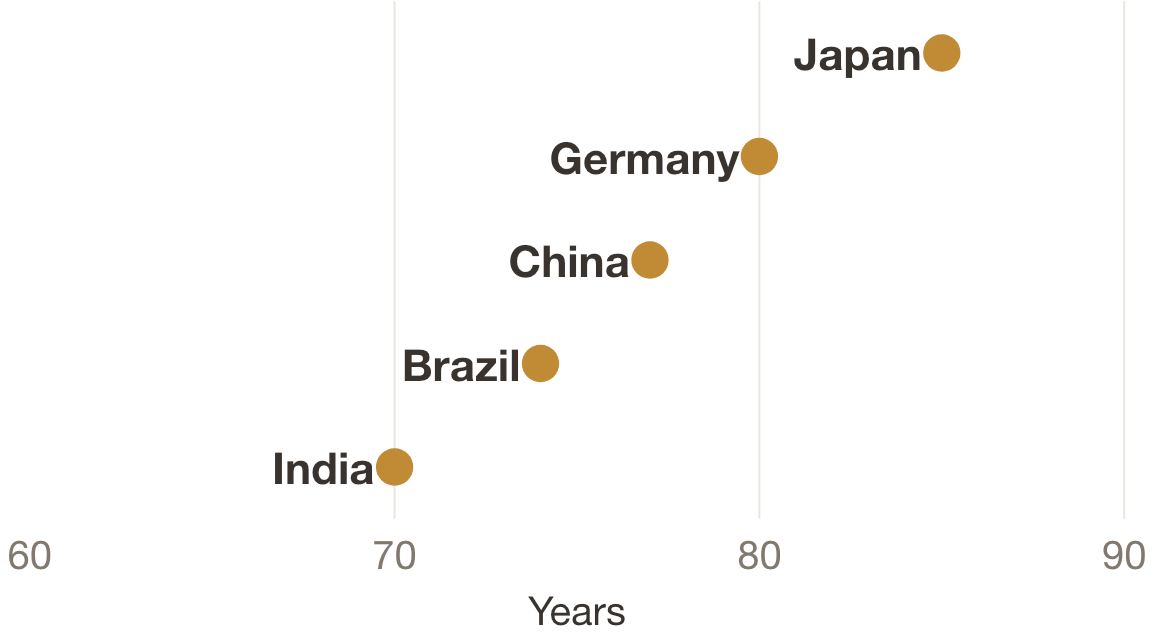

Bar chart

Lengths compare values. Start the scale at zero.

Dot plot

Positions make small differences easier to see.

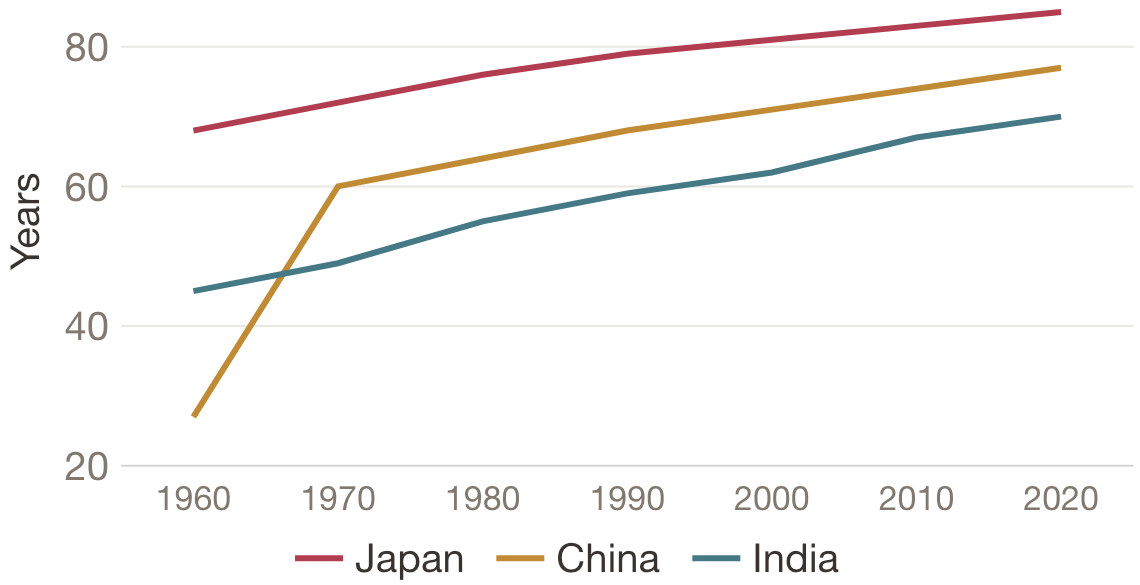

Select fields, then open Show Me. The options depend on your fields.

Tableau chart types: change over time

A line shows a trajectory. An area also emphasizes magnitude.

Line chart

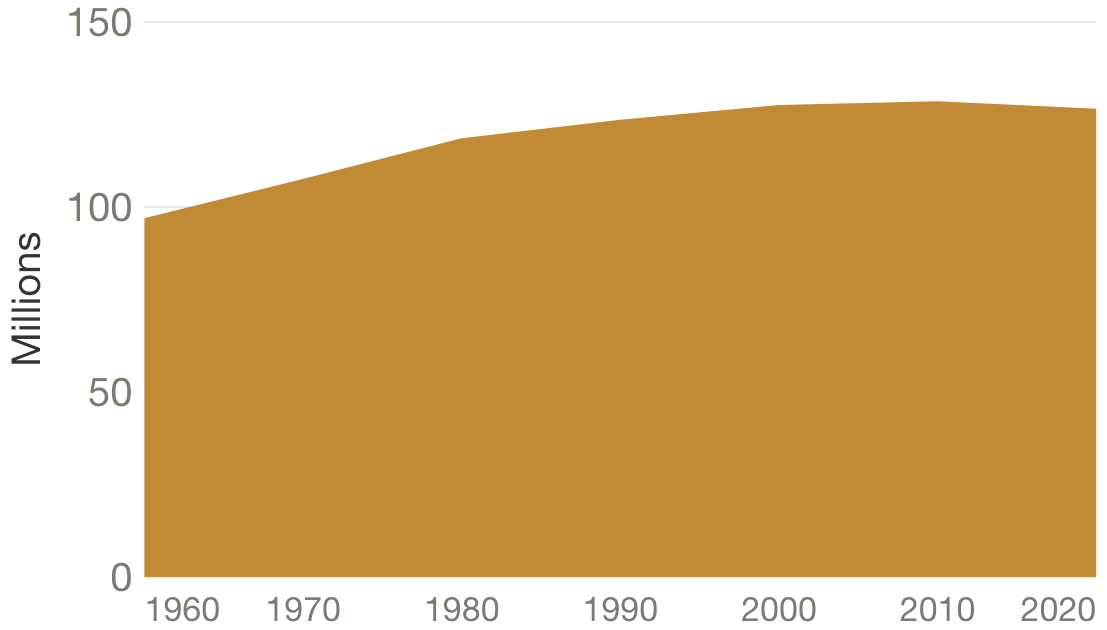

Life expectancy in Japan, China and India

Line: compare trends over time.

Area chart

Japan's population, in millions

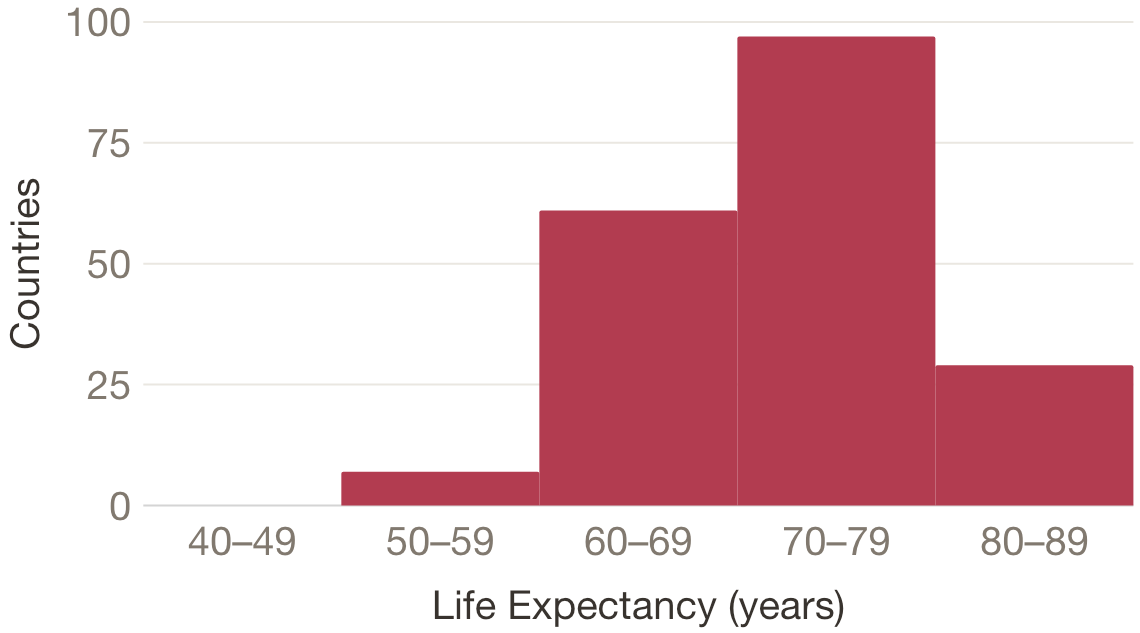

Area: use a meaningful zero baseline.

Tableau chart types: distributions

What is typical, and how much variation is there?

Histogram

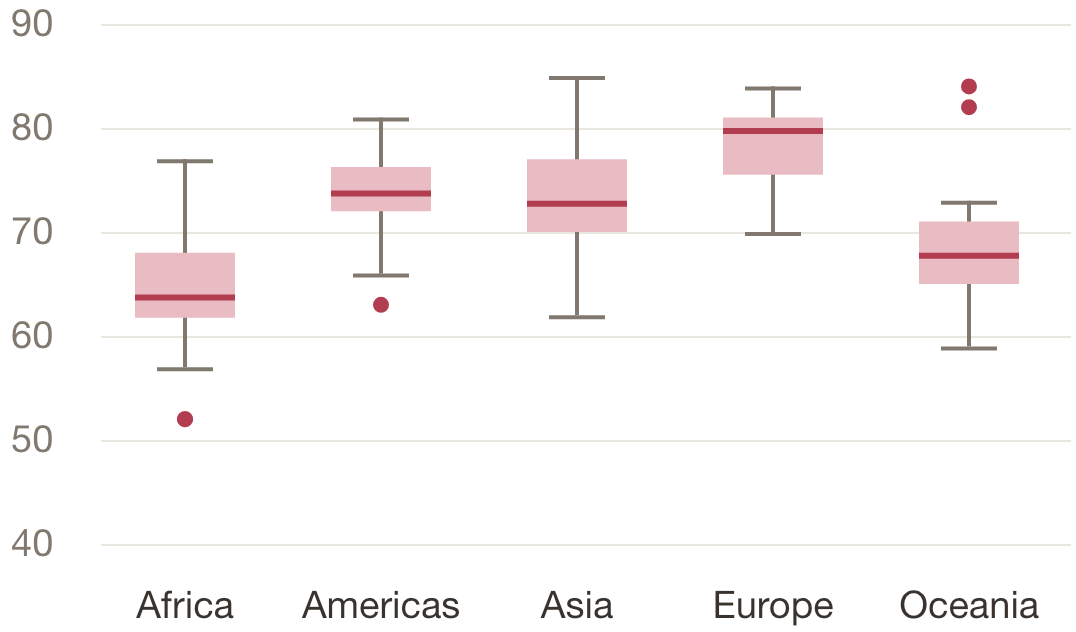

How many countries fall in each range? (2020)

A histogram counts values in numeric bins.

Box-and-whisker plot

Country life expectancy within each region (2020)

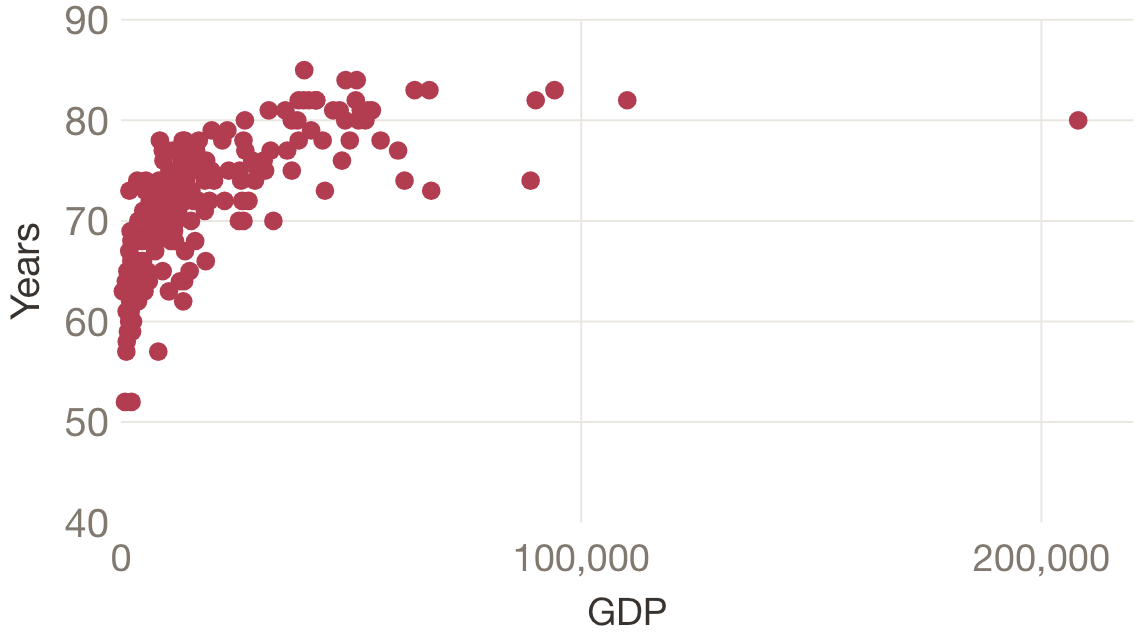

Median, middle 50%, spread and outliers.

Tableau chart types: relationships and patterns

One pair of measures, or a matrix of repeated comparisons

Scatter plot

GDP and life expectancy, one circle per country

Association does not establish cause.

Highlight table

Life expectancy by country and decade

	1980	1990	2000	2010	2020
Japan	76	79	81	83	85
Germany	73	75	78	80	80
China	64	68	71	74	77
Brazil	62	67	71	73	74
India	55	59	62	67	70

40 50 60 70 80 90

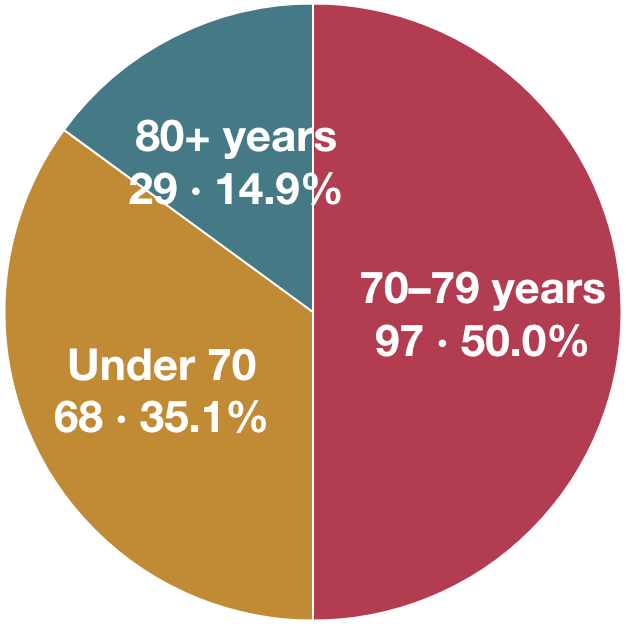

One shared color scale, in years.

Tableau chart types: parts of a whole

How many countries fall in each life-expectancy band? (2020)

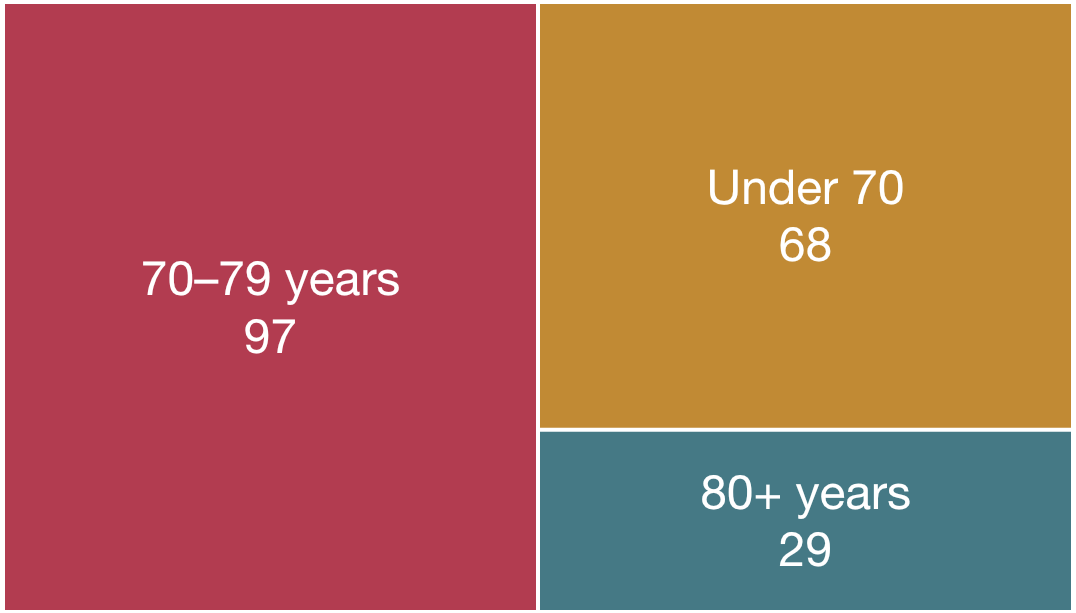

Pie chart

Shares of a total

Treemap

Parts sized by area

194 countries with valid life expectancy. Shares of countries, not people.

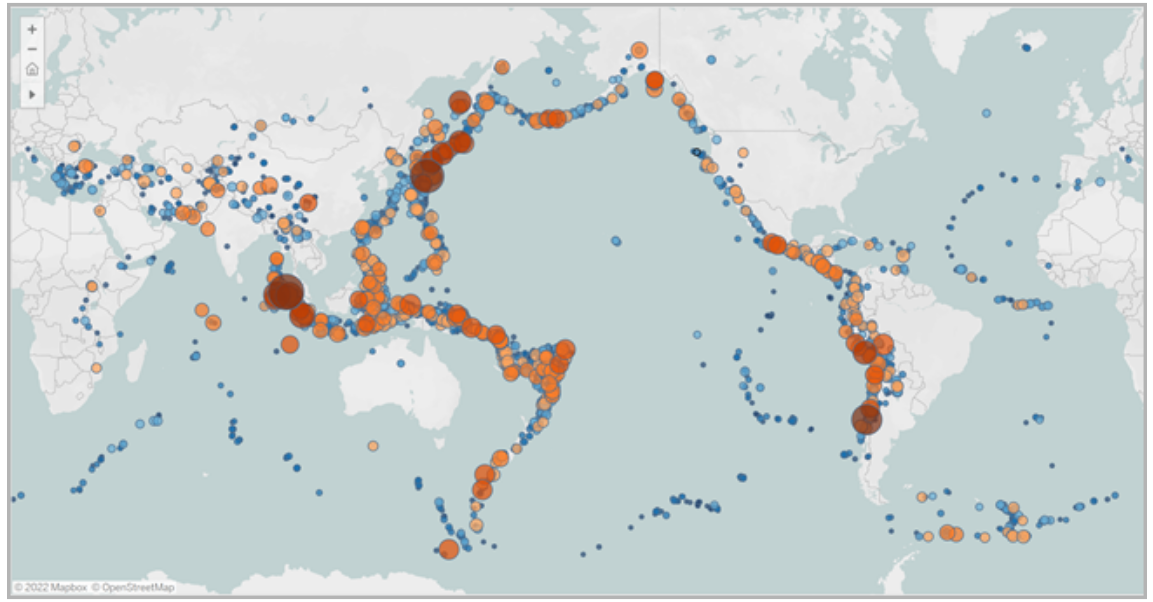

Life band → Color COUNTD(Country) → Angle / Size

Tableau chart types: geography

A map answers a question about location

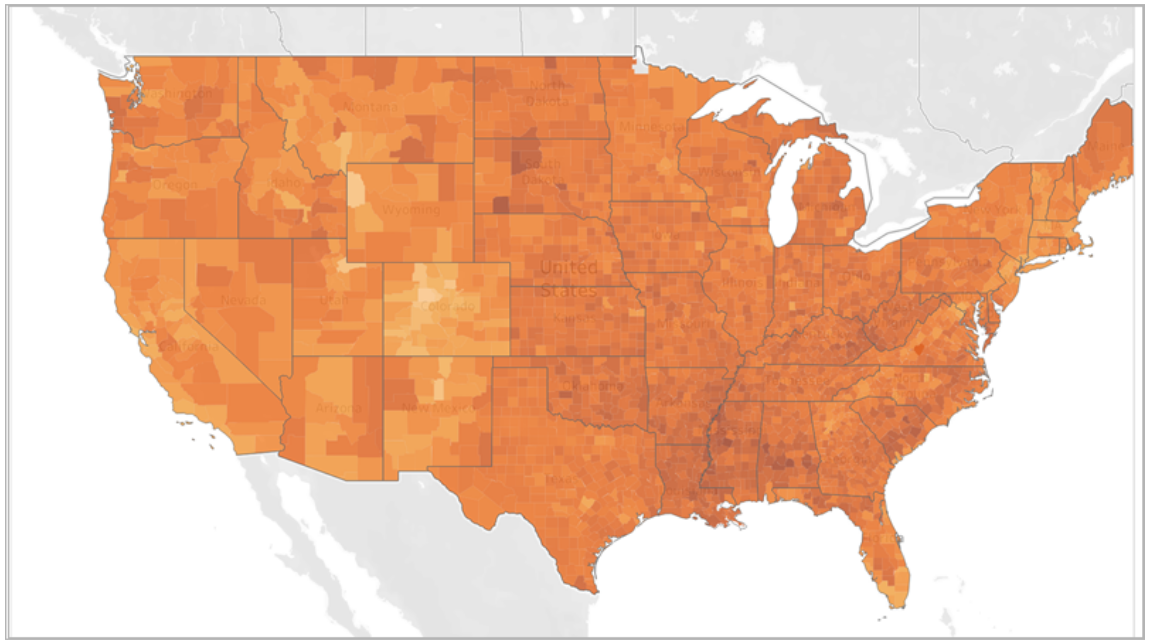

Symbol map

Size represents a value at each location.

Filled map

Color represents a value for each area.

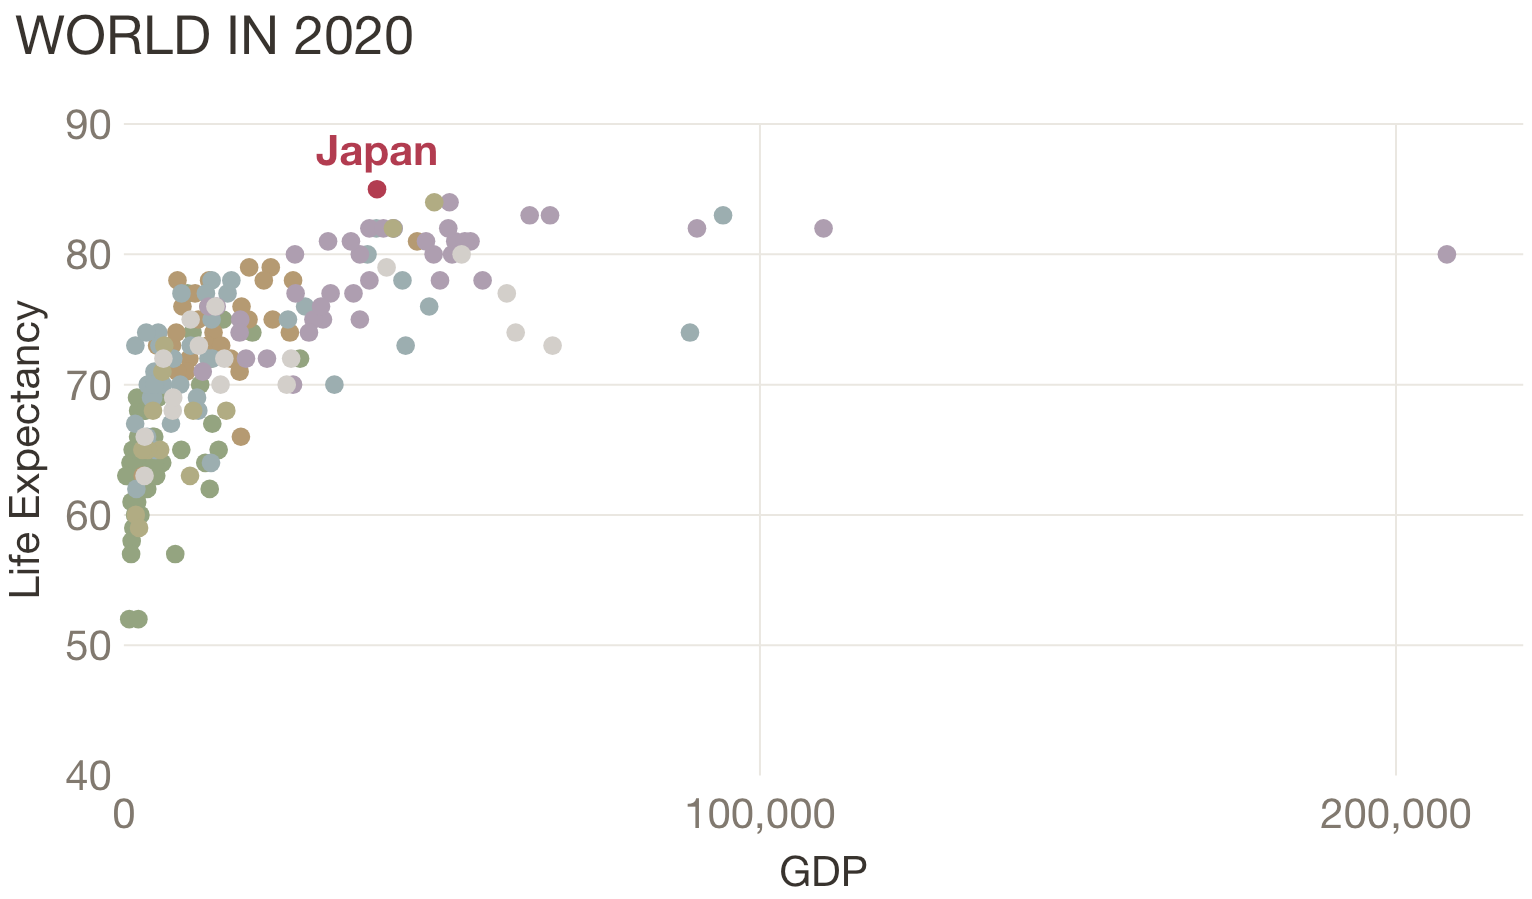

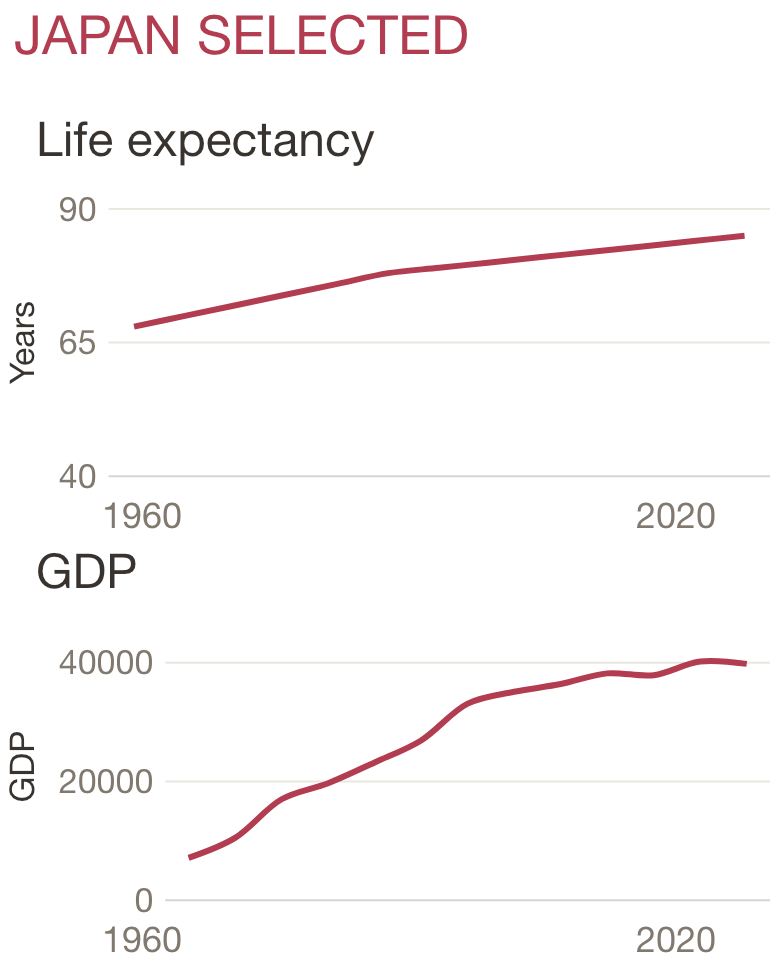

Try hans.csv: Country as a geographic field; Year = 2020; Life Expectancy on Color.

Map images: Tableau documentation examples

Today's tip: a Tableau dashboard

Last week's Gapminder chart, connected to a country's history

Click a country in the overview. Explore its history on the right.

The three worksheets

Right-click Year in the Data pane: Convert to Dimension

1 World

Columns	AVG(GDP)
Rows	AVG(Life Expectancy)
Filters	Year: 2020

Marks: Circle

Country on Detail
Region on Color

Filters: GDP > 0
Life Expectancy > 0

2 Life History

Columns	Year
Rows	AVG(Life Expectancy)
Filters	Year: 1960–2020

Marks: Line

Country on Color

Year pill menu: Continuous
Keep the full year range.

3 GDP History

Columns	Year
Rows	AVG(GDP)
Filters	Year: 1960–2020

Marks: Line

Country on Color

Duplicate Life History.
Replace the measure on Rows.

Measure pill menu: Measure > Average. Leave Pages empty for this dashboard.

The dashboard layout

A large overview and a smaller history column

1200 × 800

Tiled: horizontal container, with a vertical container on the right

1 Dashboard size

Turn Device Preview off. Select Default.
Dashboard pane > Size > Fixed size
Custom: Width 1200, Height 800

Drop sheets in the white canvas.
Gray space is outside the dashboard.

2 Tiled layout

World on the left.
Both histories in a vertical container on the right.

3 Year filter scope

Year filter menu: Apply to Worksheets
Selected Worksheets: World only
Histories keep 1960–2020.

Filtering with the sheet’s funnel icon

World sheet > Use as Filter

1 Select the sheet

Click World in the dashboard.

2 Use as Filter

Click the funnel icon on its toolbar.

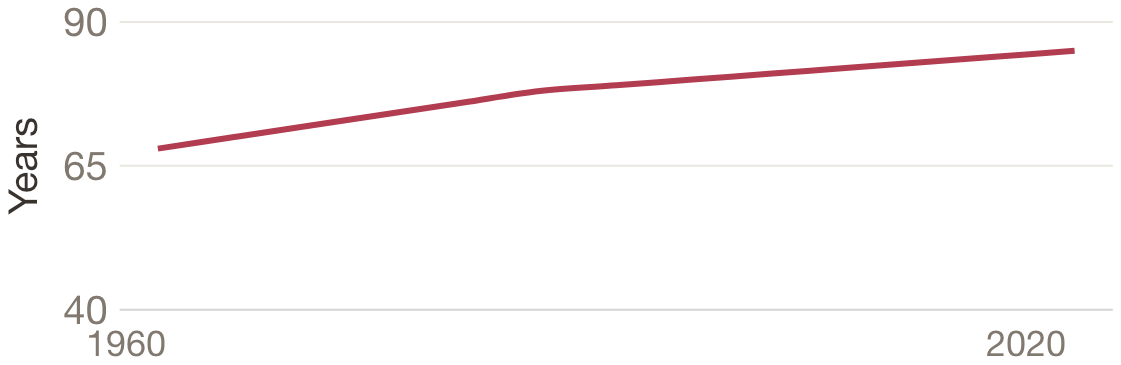

3 Select a country

Click Japan, then try India.

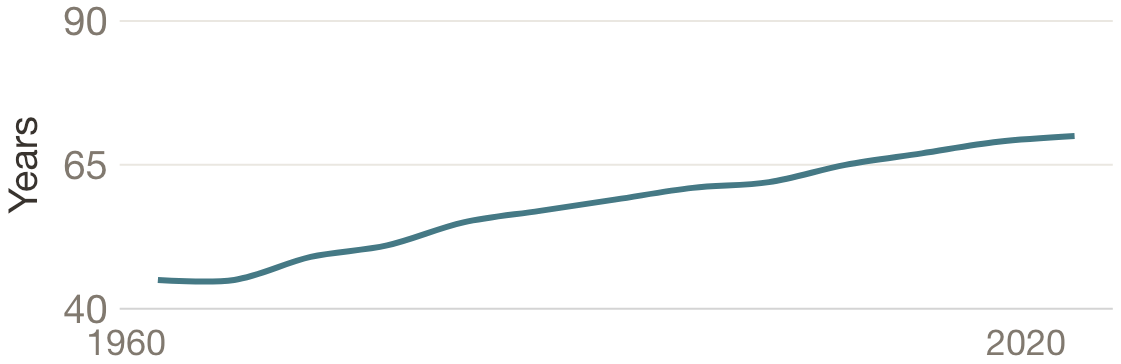

If a history collapses to 2020:

Dashboard > Actions: edit the generated filter.
Selected Fields: Country → Country only
Clear selection: Show all values

Click Japan

Then click India

Life expectancy, 1960–2020

Highlighting the selected country

Dashboard > Actions > Add Action > Highlight

Source sheet

World

Run action on

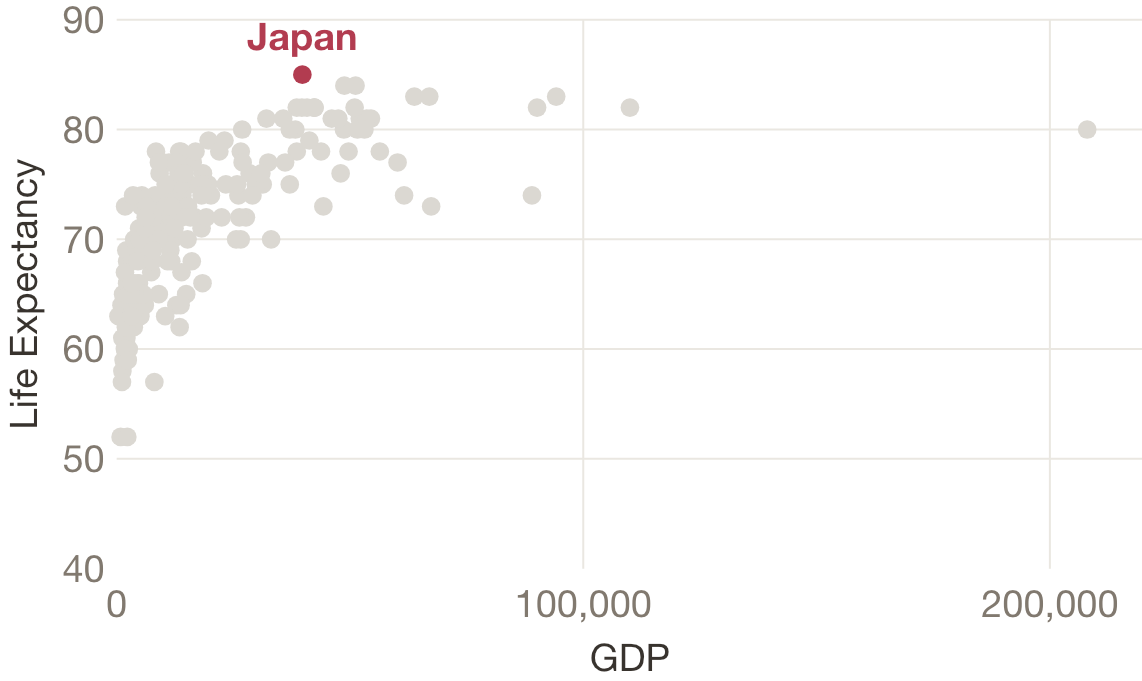

Select

Target sheet

World

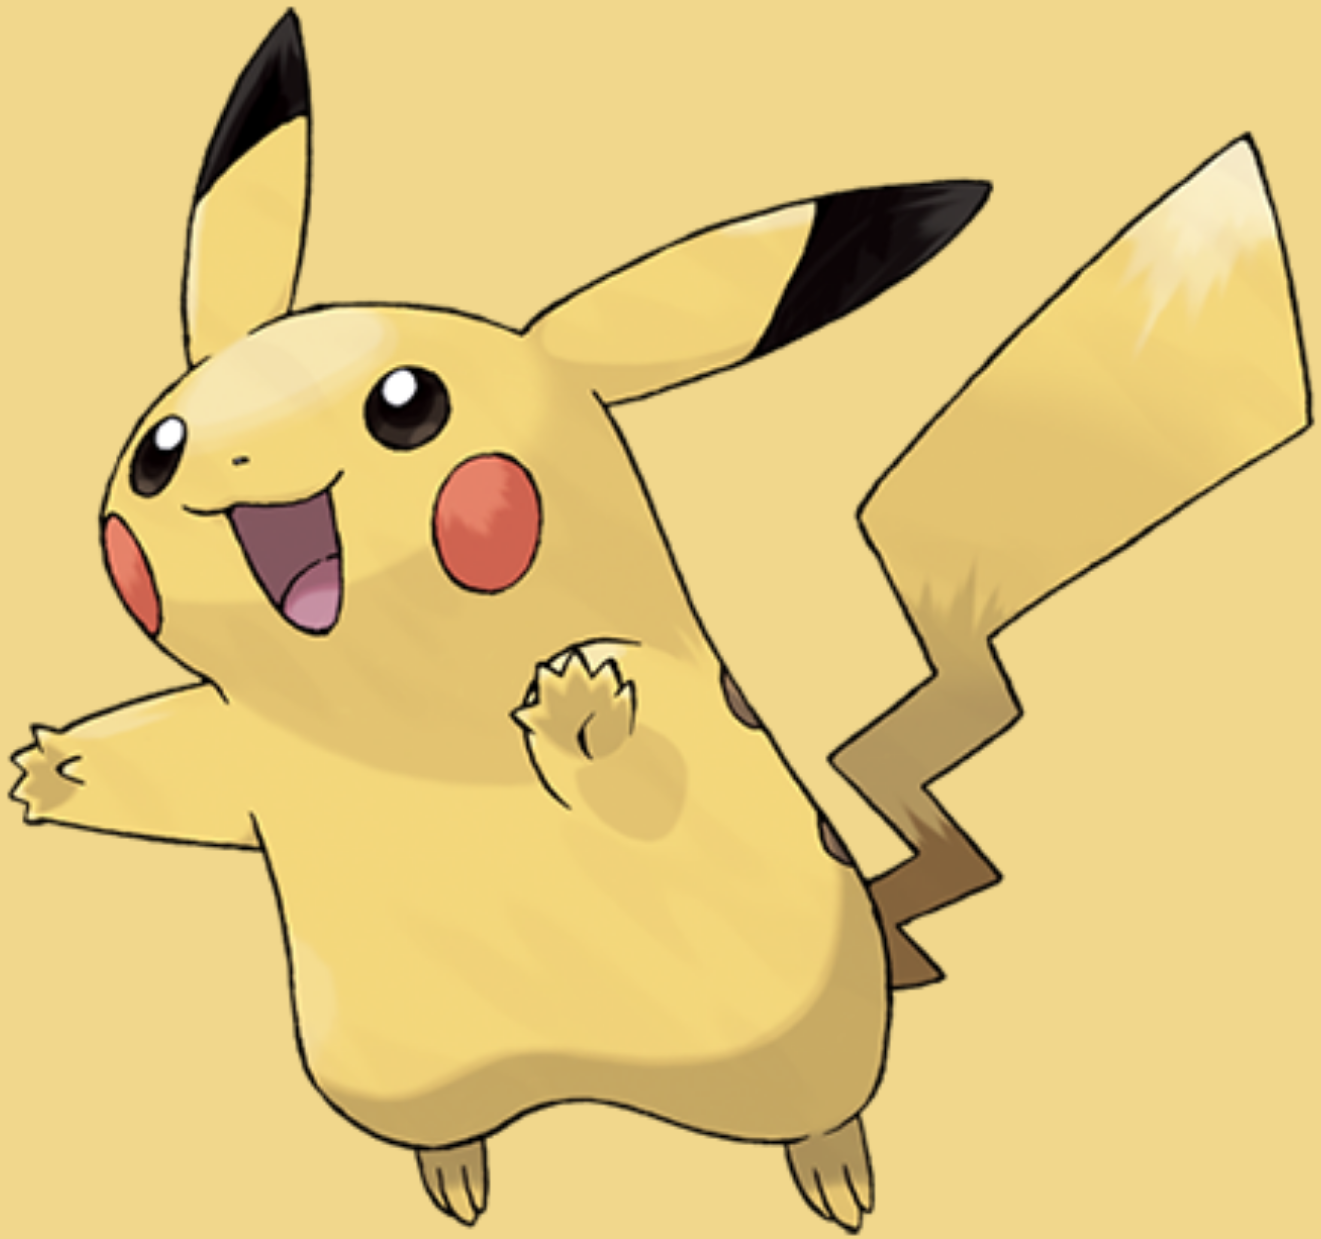

Target Highlighting

Selected Fields: Country

Click Japan: other circles fade.
Click empty space to clear.

Highlight: keep other countries visible. Filter: show only the selected country.

Pokémon Challenge

One dataset. Your question. No Pokémon knowledge needed.

15 min Solo

Choose a question. Make one chart in Tableau.
Give it a title that communicates your finding.

Groups of 4 Share

Everyone explains their finding and one visual choice.
Choose one chart for its insight and clarity.

One group submission

Submit names, title, finding and why you chose it.
Include one screenshot. A second is optional.

CSV + variable guide

Submit group work

Results / show and tell

A first chart with Pokémon images

Compare Attack for five Pokémon

01 Open the updated CSV

Text file: pokemon-review.csv. Open Sheet 1.

02 Choose five Pokémon

Name to Filters: Bulbasaur, Charmander, Eevee, Pikachu and Squirtle.

03 Enable image URLs

Right-click Image_URL in the Data pane. Choose Image Role > URL.

04 Build the rows

Rows: Image_URL first, then Name to its right.

05 Build the bars

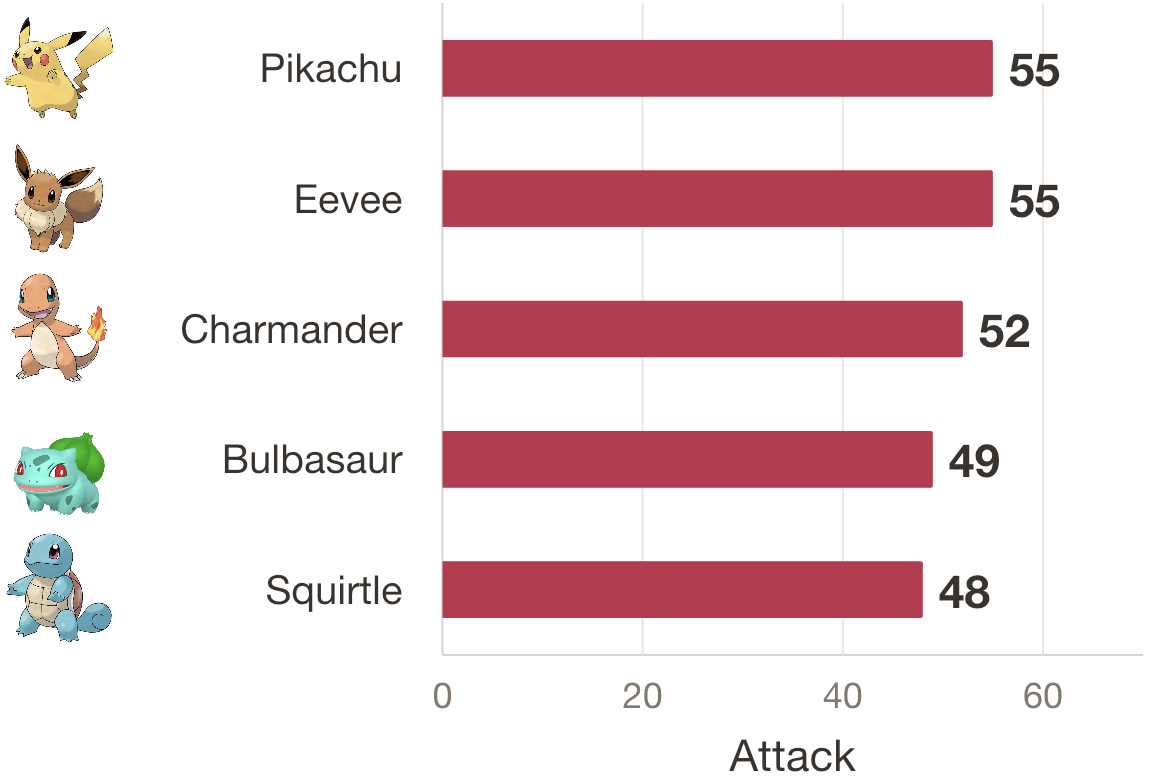

Attack to Columns. Pill menu: Measure > Average. On the Marks card, choose Bar.

06 Sort and label

Image_URL > Sort: Field, Attack, Average. Descending. Marks > Label: show mark labels.

07 Make the images larger

Widen the image column. Make rows about 80px tall. View: Standard. Attack axis starts at 0.

Images appear in row headers. Bars show average Attack.

Homework: a filtered dashboard

Your data. Existing or new.

01 2+ sheets in one dashboard

02 At least one working filter

03 Publish on Tableau Public

04 Submit the project link, 1 screenshot (2nd optional), a short explanation, and your data/source URL

How-to guide

Submit individually through the usual homework form.
