The lady with the lamp

Florence Nightingale (1820-1910)

MISS NIGHTINGALE, IN THE HOSPITAL, AT SCUTARI.—(SEE PRECEDING PAGE.)

ENGLAND AND HER SOLDIERS.

BY HARRIET MARTINEAU.

"Let me speak proudly.—Tell the Constable
We are but warriors for the working day:
Our gayness, and our gilt, are all besmirched
With rainy marching in the painful field.
There's not a piece of feather in our host
(Good argument, I hope, we shall not fly),
And time hath worn us into slovenry:
But, by the mass, our hearts are in the trim."
KING HENRY V., Act iv. *Scene* 3.

"I know already by your forwardness, that you have deserved rewards and crowns; and we do assure you, on the word of a prince, they shall be duly paid you."
QUEEN OF ENGLAND *to her Soldiers*, 1588.

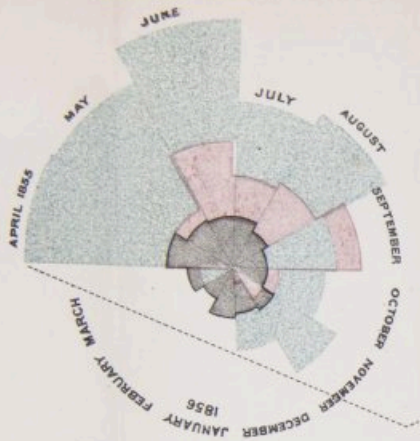

WITH THREE ILLUSTRATIVE DIAGRAMS.

LONDON
SMITH, ELDER, & CO. 65 CORNHILL.
1859

DIAGRAM OF THE CAUSES OF MORTALITY IN THE ARMY IN THE EAST.

2.
APRIL 1855 TO MARCH 1856.

1.
APRIL 1854 TO MARCH 1855.

The Areas of the blue, red, & black wedges are each measured from the centre as the common vertex.

The blue wedges measured from the centre of the circle represent area for area the deaths from Preventible or Mitigable Zymotic diseases, the red wedges measured from the centre the deaths from wounds, & the black wedges measured from the centre the deaths from all other causes.

The black line across the red triangle in Nov.r 1854 marks the boundary of the deaths from all other causes during the month.

In October 1854, & April 1855, the black area coincides with the red, in January & February 1855, the blue coincides with the black.

The entire areas may be compared by following the blue, the red & the black lines enclosing them.

Why Python?

matplotlib

seaborn

plotly

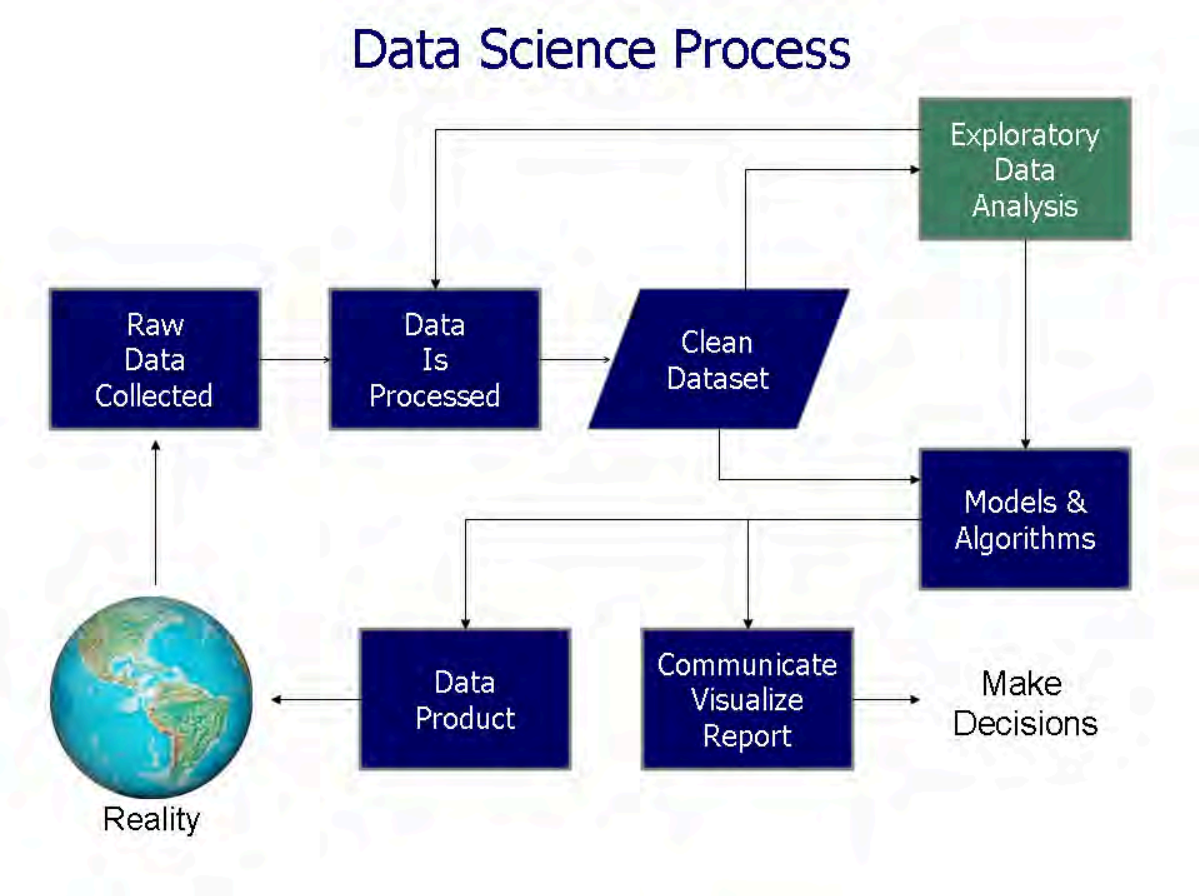

bokeh

“The greatest value of a picture is when it forces us to notice what we never expected to see.”

— John Tukey, 1977

EDA

Exploratory Data Analysis

① Discovery through Visualization

Seeing patterns, trends, and outliers that numbers alone cannot show.

可視化による発見

数字だけでは見えないパターンや傾向、外れ値を「見る」ことで発見する。

② Iterative Exploration

Analyze, visualize, question, and refine repeatedly to uncover deeper insights.

反復的な探究

可視化と分析を繰り返し行い、データの奥にある意味を掘り下げる。

③ Openness to Surprise

Expect the unexpected — EDA values curiosity over confirmation.

意外性への開放性

仮説の検証よりも、好奇心と「予想外の発見」を重視する。

Anscombe's quartet

概要 [編集]

アンスコムの例は右のグラフに示された4つのデータセットからなる。4つ全てについて以下が成り立つ。

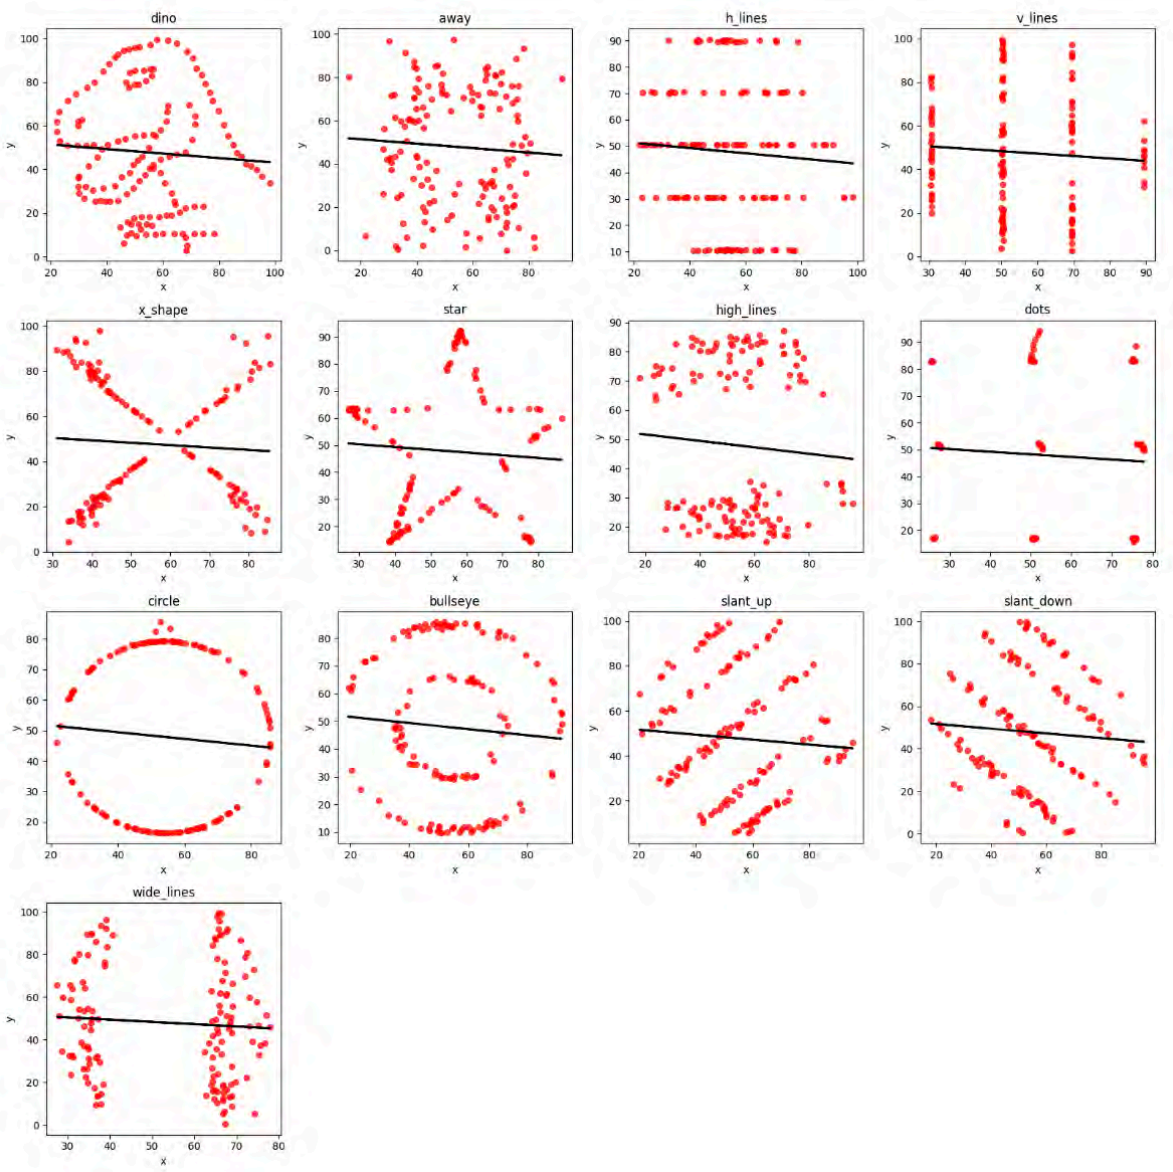

統計量	値
x の平均	9 (正確に一致)
x の標本分散	11 (正確に一致)
y の平均	7.50 (小数第2位まで一致)
y の標本分散	4.122 or 4.127 (小数第3位まで一致)
x と y の相関係数	0.816 (小数第3位まで一致)
回帰直線	$y = 3.00 + 0.500x$ (それぞれ小数第2位、小数第3位まで一致)

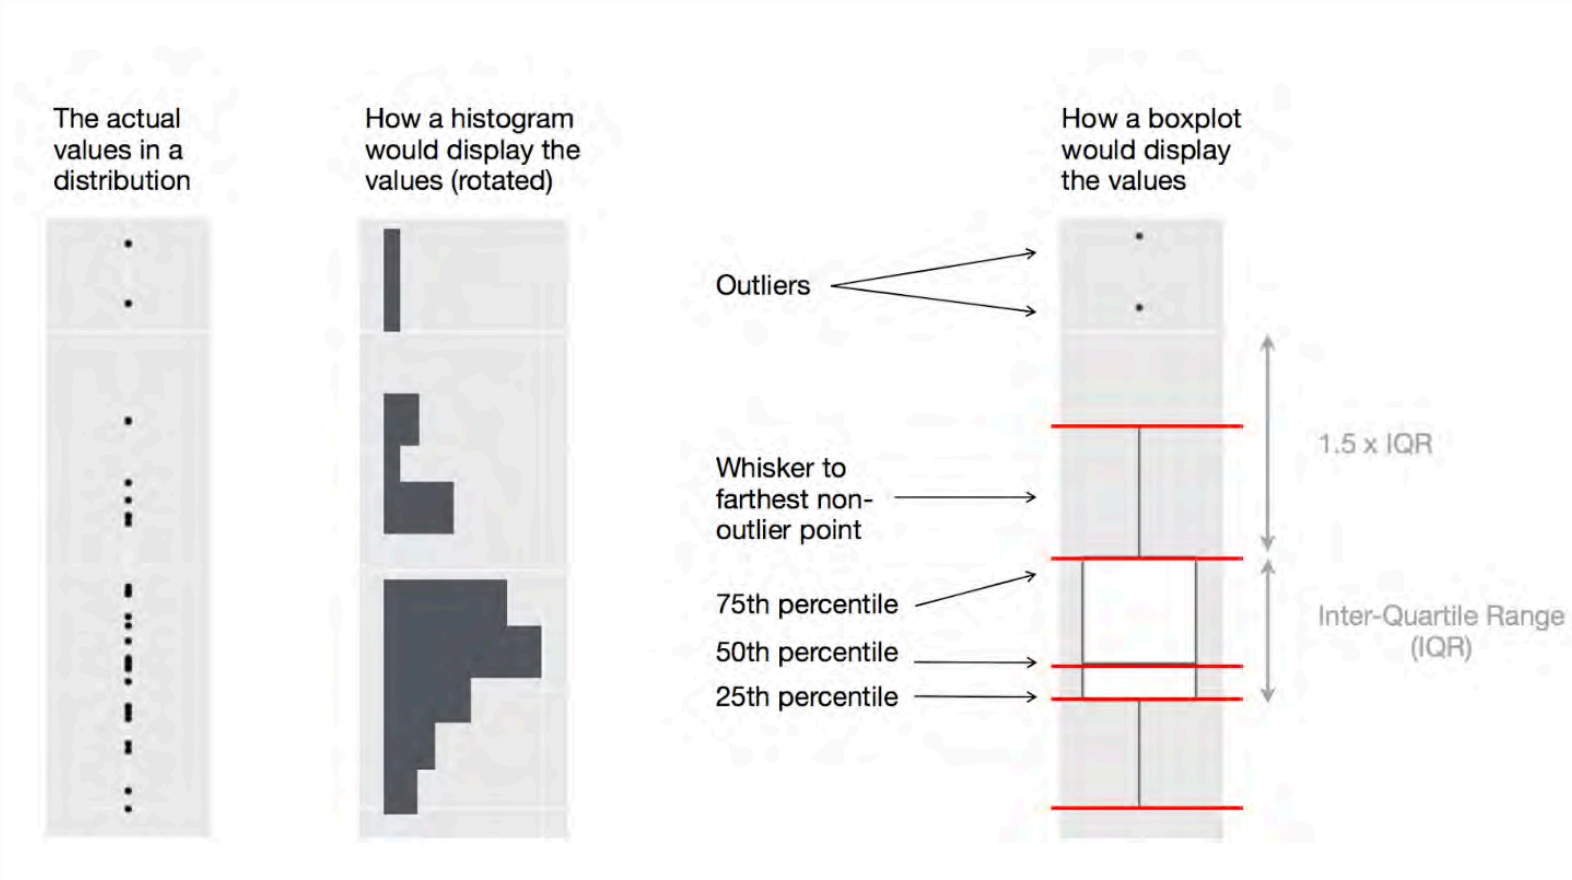

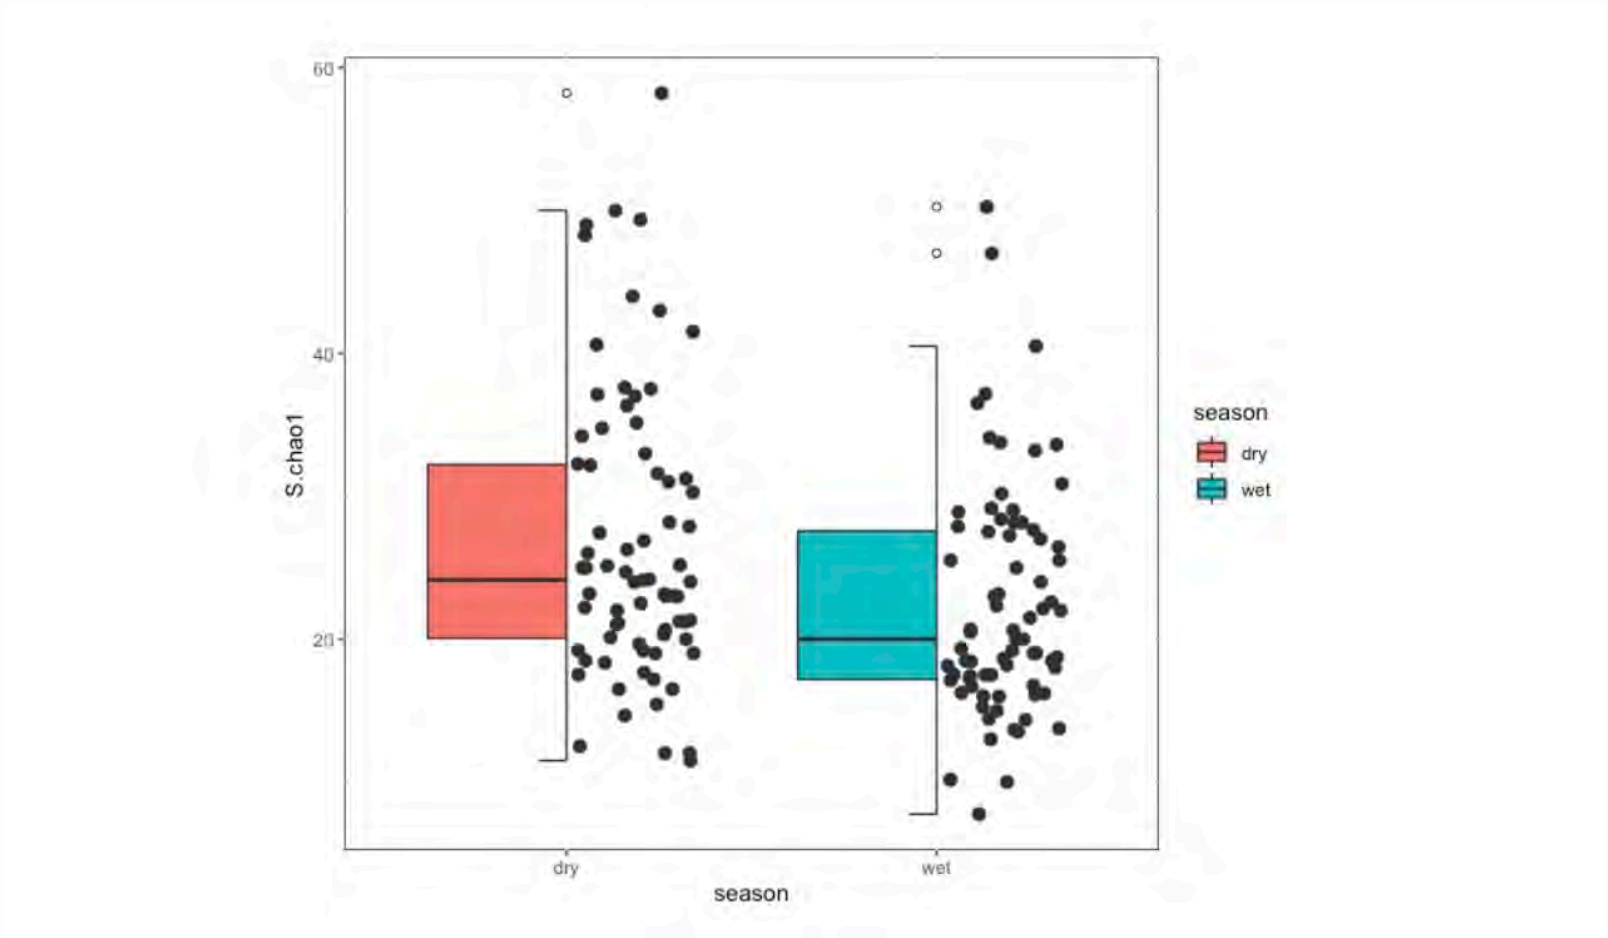

回帰直線が同じになる4つの散布図
